Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: Claims 5, 6, 8, 9, 11, and 12 are allowable over prior art references because related references do not disclose all the limitations of the claims, particularly a data phase detector which determines phase error between data transitions in the input sequence and the sampling clock phases, based on amplitudes of the sampled edges, the determined phase error being fed into the sampling clock generator to adjust the phase of the sampling clock, wherein the phase detector comprises switches for adjusting polarities of sampled edges based on previous and next data values, the polarity-adjusted sampled edges being added together to form a phase error indication, the phase error indication driving the sampling clock generator.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
